## Letters To The Editor

(Continued from Page 1)

When I realized the scouts were not going to do this anymore, I tried to find a group to take this over. At the present time there is possibility of a high school group doing the job. If this fails and we cannot get a local group, we may be able to get a group of scouts from down state to help us out.

Also he claims all livers neglected to equip their canoes with safety equipment or do not try and steer their people to a proper campsite. The Avalanche has printed all our material since we have been in business. We advise that our canoes will be equipped with cushions, etc. These cushions are the preserver type. Also we have printed material that is handed out to every canoeist.

They are cautioned about littering and are advised about proper treatment of fishermen. Some have admitted bumping fishermen or boats but not from lack of skill. Also as far as campsites are concerned I have on file, letters I have written to Consumers Power Company concerning this. Consumers tells me the state has obtained additional land for such purposes and that they feel it is unnecessary for me to leave land from them for such campsites, at this time.

We know canoeists are not all angels, nor are fishermen, nor anyone else as far as that goes. They are people the same as you and me. Some people on the river welcome these strangers, they enjoy them and get along with them as they are also people. Some on the other hand do not. Tolerance is required on both sides. It seems as though a poem I remember would apply. It went something like this: the wording may not be exact but the meaning is still there.

Let me live in the house by the side of the road.  
Where the rage of men goes by.  
They are rich, they are strong,  
they are wise, foolish.

So am I.  
So who should I set in the scorn-  
er's seat?

Or hurl the cynic's ban.  
Let me live in the house by the side of the road.  
And be a friend to man.

Substitute the word "river" for "road" and if all canoeists, fishermen, and property owners heed its advice a big step will be taken in solving our river problem.

Cordially,

## MOOSE NEWS

Grayling Moose Lodge will hold their installation of new officers on April 23rd at 7:30 p. m. There will be a dinner and dancing all afternoon and evening. Ray Stephenson of Traverse City Lodge and a Past Governor of that lodge will be the installing officer for this occasion.

The next Enrollment of new members will be held the first or second week in May, so if anyone having applications to fill out, do so early so they may be processed in time for this next Enrollment.

Did you know where your dues money goes?

It goes to help support nearly one thousand healthy active boys and girls who have lost one or both of their parents and are finding at Mooseheart the finest substitute for a happy home and loving parents yet devised by man. All educational, spiritual, social and cultural benefits every parent wants for his children are supplied under the guidance of experts.

At Mooseheart they enjoy one of the finest educational programs available in the United States. A

full athletic program makes sports of all kinds a joy for the children of all ages. The cultural program of music, glee club and choir are comparable to those of any leading high school.

The religious training is carefully supervised. The children are reared in the faith that prevailed in the home of their parents. Services are conducted in the magnificent "House of God" which stands as a living monument to religious tolerance. This church was built by your donations and cost \$4,000,000 to build. It is the only church of its kind in the world where all the Christian faiths worship under one roof.

All this your dues are used for. It is everyone's hope that they will never have use for this security that is provided for their family, but if it should ever happen, you can rest assured that your children will say, as over 5,000 other children have said before them, "Thank God that my Dad was a member of the Loyal Order of Moose."

It is in motivation to what qualities and to assess the value of what voters regard. To begin with, a rating of desirability combined, raised by 69 per cent; decisiveness, by 11 per cent; foreign affairs, by 10 per cent. To the other side, the ambition was listed. Residential attributes mentioned were patriotism, sincerity, weakness. The poll goes to the seven most common images of every three years about him, pro or con. ## Michigan's Factories, Farms and Stores Depend on Trucks

Manufacturing, farming, the retail business — all have one thing in common: each needs transportation facilities. And, since the motor truck provides fast, flexible, direct service unequalled by any other form of transportation, more tonnage is shipped by truck in Michigan each year. (Nationally trucks haul more than 3 times as much tonnage as all other systems combined.)

Every truck you see on the road is working — working to help keep Michigan's economy humming, to help keep employment and sales high. There isn't a corner of the State that isn't served daily by trucks. And factories and shopping centers can be located anywhere and be assured of efficient truck service so long as they're on a road.

You see how vital trucks are to Michigan.

**Chamber of Commerce Minutes**  
Meeting of the Board, Crawford County Chamber of Commerce, March 24, 1980.  
Members Present: Rochette, Johnson, Latusek, Bond, Schulze, and Dubois.  
Members Absent: Wolff, Wood, Jensen.  
Guests: Mr. C. R. Holcomb.  
Motion by Schulze and seconded by Latusek that the treasurer's report be accepted as read and that all bills presented be paid.  
Mail was read and discussed.  
1. The winter sports promotion tabled from last meeting was presented. Schulze proposed a form of little league hockey which was rejected after exploration.  
2. The board was told of Senator Morris' investigation of the Economic Development Dept., as the result of some careless statements made at the Grayling meeting. It was explained that the Chamber and its Industrial Committee took exception and that Senator Morris was so informed by both telephone and wire.  
3. The delinquent Chamber members were discussed and it was decided that again there would be a membership committee made up to contact those delinquents. Board member John Latusek will chairman this committee.  
4. The Board was told of Mike Malloy's request to start action to prevent the removal of the New York Central Budd Car (Bee Liner). The Manager was instructed to write the Central manager of the road for confirmation and additional information.  
5. The Board approved mailing this month's Chamber Bulletin as unsealed third class mail. This is being done because this bulletin is too heavy to go first class for four cents, and to determine if the mailing will be read as widely as when mailed first class. If so, future mailings will be handled in this manner.  
Motion by Bond and seconded by Schulze that the meeting be adjourned at 5:50 p. m.

**Caution On Use Of Motorized Goats**  
Parents of children operating four-wheeled motorized goats are being cautioned by Sgt. Carl Harrison, commanding officer of the Houston Lake post of the Michigan State Police, to warn them it is not only dangerous but illegal to use the machines on streets and highways.  
Now that warmer weather is here, the goats, or midget cars as they are otherwise called, will be wheeled out but unless their operation is restricted they can be hazardous.  
Two-wheel motor scooters are licensed under regulation for street and highway use the same as motorcycles, but the secretary of state's department does not license the midget cars because they are not equipped for safe operation on streets and highways.  
Goats must be operated either on private property or on parking lots or tracks specifically authorized for their use when other vehicles are not occupying these areas. A number of such places have been established by private interests and there are several racing tracks where the junior drivers compete.  
Among the dangers of operating goats on streets and highways are their smallness and low height which make it difficult for other motorists to spot them.

**Selective Service College Qualification Test**  
Michigan students may now apply for the annual Selective Service college qualification test which has been scheduled for April 28. It has been announced by Colonel Arthur A. Holmes, state director of Selective Service.  
The test will be conducted at 22 schools and colleges in Michigan. Test scores are used by local boards in considering students for deferment from induction for study as graduate or undergraduate students.  
In urging eligible students to take the test, Colonel Holmes declared, "The test is for the student's benefit as well as for the nation's good. A local board should have full information about a student in order to classify him, including his class standing and score on this test. A high test score may compensate for occasional low class standing."  
The purpose of student deferments is to give promising students an opportunity to prepare themselves for careers in the national interest. For those students who hesitate to take the test because a deferment extends liability, the director declared, "No registrant can remain out of service beyond the current age for induction at about 23 years with an exemption or a deferment which extends liability."  
Scientific and professional engineering organizations are also urging students preparing for careers in these fields to take the test. Test scores are considered particularly important when local boards are considering whether students should be deferred for graduate study.

New 200X is the basic fuel in Sunoco's 6-fuel, 6-price Custom-Blending System—the system that delivers "Fuelpower to fit your car's horsepower!" The five higher octane fuels in the system are top-quality premiums and therefore already contain premium ingredients. But since they are also the result of precise automatic blending—in Sunoco's miracle pump—of 200X and Sunoco Octane Concentrate, they all share a big performance boost!

Exclusive new multi-additive engine conditioner cleans, powers up your engine after just two tankfuls. Proved by actual tests to offer every motorist extra performance 3 ways at regular price!

Today, there's a new gasoline breaking all performance records for regular priced fuels! Test after test on engines using "regulars" prove Sunoco's new Blend 200X can produce remarkable increases in power, mileage and engine protection. Such performance is possible because 200X is made like a premium—contains a Sunoco-developed engine conditioner that protects the carburetor... keeps valves and cylinders free of power-robbing gum... prevents spark plug fouling and gas waste... eliminates stalling. And this action adds up with each tankful! New 200X is at your Sunoco dealer's now. Try it and see for yourself!
